Sometimes i ride a child's scooter to work. i really wish i had a segway or a joystick, it would make things much more exciting. i could be moving so fast and i'd never want to stop. i was lying by the way, i don't really have a job, or a child's scooter. just a child's mind and a terribly addiction on heroin. sometimes i just lay on the ground, not moving for several hours. i don't really have a reason for doing this... except perhaps a lack of anything... except i mean all the time. i sometimes discovered that my legs no longer work, they cannot support me. they have become support together and are stuck tail - perhaps i'll take like 4 swimming lessons.
